**Comentary:** the relative importance of the execution factors within our dealing process will vary depending upon a number of criteria, namely:

1. Investment intent of the investment manager who created the order
2. The characteristics of financial instruments that are the subject of that order: and
3. The characteristics of the execution venues to which that order can be directed

Each client order that is transacted by our traders is inherently unique in its characteristics and market conditions are never constant. The relative importance of the execution factors is therefore variable.

The most important factors for cash equities are price, cost and speed/likelihood of execution according to the investment manager's intent and/or the liquidity of the instrument.

Each order is handled on its own merit and transacted in line with our Best Execution Policy.

Nevastar Finance (NF) has no common ownership with the top 5 equity brokers. NF is transacting via the in-house brokers of its clients' relevant custodians. Nevastar Finance uses third party brokers, when it can, in order to provide its clients with lower commission rates than the custodian banks'.

Nevastar Finance does not provide its services to retail clients. NF monitors the total cost analysis for Best Execution assessment.

**Commentary:** Due to the large variance in liquidity across fixed income it is sometimes necessary in the illiquid markets to place the highest priority on the likelihood of execution. It would be difficult to suggest that this comes at the expense of price as price discovery is incomplete which limits choice.
